AUTHOR INDEX

Anolick, C.
Flammability Characteristics of Healthcare Mattresses, p. 168

Benisek, L.
The Importance and Relevance of Burning Behavior, Smoke, and CO Emission from Upholstered Seating, p. 96

Bhat, G. R.
Extinguishability of Flammable Textiles: Part III – Effects of Cooler, Inert Bodies, p. 135

Brandt, D. L.
Smoldering Tests on Furniture and Aircraft Seat Fabrics, p. 123

Brauer, D. P.
Ignitability by Radiant Heat of Furniture Upholstery Fabrics, p. 217

A Compilation of Relative Toxicity Data on Furniture Upholstery Fabrics, p. 250

Damant, G. H.
Consumer Product Flammability: A Brief Review, p. 20

Smoldering Tests on Furniture and Aircraft Seat Fabrics, p. 123

A Bibliography of Published Information on Furniture Flammability, p. 245

Day, M.
Combustibility of Loose Fiber Fill Cellulose Insulation: The Role of Borax and Boric Acid, p. 113

An Electrical Device for Evaluating the Ignitability of Textile Floor Covering Materials, p. 238

Galloway, J. R.
Flammability Characteristics of Healthcare Mattresses, p. 168

Gentry, W. T.
Boric Acid Treated Cotton Mattresses Resist Open Flame and Cigarette Ignition, p. 26

Hellyer, W.
Flammability Characteristics of Healthcare Mattresses, p. 168

Hilado, C. J.
Screening Tests on Materials Used in Home Furnishings and Consumer Products, p. 41

Ignitability by Radiant Heat of Some Materials in Home Furnishings, p. 68

Smoldering Tests on Furniture and Aircraft Seat Fabric, p. 123

Relative Toxicity and Flash-Fire Propensity of the Pyrolysis Gases from Polyester Urethane Flexible Foams, p. 163

Ignitability by Radiant Heat of Furniture Upholstery Fabrics, p. 217

A Compilation of Relative Toxicity Data on Furniture Upholstery Fabrics, p. 250

A Bibliography of Published Information on Smoldering Combustion, p. 260

Huttlinger, P. A.
A Bibliography of Published Information on Smoldering Combustion, p. 260

Knoepfler, N. B.
Boric Acid Treated Cotton Mattresses Resist Both Open Flame and Cigarette Ignition, p. 26

Madacsi, J. P.
Boric Acid Treated Cotton Mattresses Resist Both Open Flame and Cigarette Ignition, p. 26

Miles, L. B.
Extinguishability of Flammable Textiles: Part III – Effects of Cooler, Inert Bodies, p. 135

Moussa, N. A.
Materials For Fire Resistant Passenger Seats in Aircraft, p. 201

Murphy, R. M.
Screening Tests on Materials Used in Home Furnishings and Consumer Products, p. 41

Ignitability by Radiant Heat of Some Materials in Home Furnishings, p. 68

Perkins, L. R.
Flammability Characteristics of Healthcare Mattresses, p. 168

Prager, F. H.
Study of the Burning Behavior of Upholstered Furniture, p. 3

Ohlemiller, T. J.
Minimizing Smolder Tendency in Flexible Polyurethanes, p. 59

Olcomendy, E. M.
Relative Toxicity and Flash-Fire Propensity of the Pyrolysis Gases from Polyester Urethane Flexible Foams, p. 163

Phillips, W. A.
The Importance and Relevance of Burning Behavior, Smoke, and CO Emission from Upholstered Seating, p. 96

Rogers, F. E.
Minimizing Smolder Tendency in Flexible Polyurethanes, p. 59

Spivak, S. M.
Extinguishability of Flammable Textiles: Part III – Effects of Cooler, Inert Bodies, p. 135

Stewart, C. W.
Flammability Characteristics of Healthcare Mattresses, p. 168

Sun, R. L.
Extinguishability of Flammable Textiles: Part III – Effects of Cooler, Inert Bodies, p. 135

Suprunchuk, T.
An Electrical Device for Evaluating the Ignitability of Textile Floor Covering Materials, p. 238

Szabat, J. F.
Combustibility Aspects of Polyurethane Foams for Mattresses, p. 82

Tesoro, G. C.
Materials For Fire Resistant Passenger Seats in Aircraft, p. 201

Wiles, D. M.
Combustibility of Loose Fiber Fill Cellulose Insulation: The Role of Borax and Boric Acid, p. 113

An Electrical Device for Evaluating the Ignitability of Textile Floor Covering Materials, p. 238

Yeh, K.
Extinguishability of Flammable Textiles: Part III – Effects of Cooler, Inert Bodies, p. 135

SUBJECT INDEX

Aircraft Fabrics
Smoldering Tests on Furniture and Aircraft Seat Fabrics, p. 123

Borax
Combustibility of Loose Fiber Fill Cellulose Insulation: The Role of Borax and Boric Acid, p. 113

Boric Acid
Boric Acid Treated Cotton Mattresses Resist Both Open Flame and Cigarette Ignition, p. 26

Combustibility of Loose Fiber Fill Cellulose Insulation: The Role of Borax and Boric Acid, p. 113

Burning Behavior
Study of the Burning Behavior of Upholstered Furniture, p. 3

The Importance and Relevance of Burning Behavior, Smoke, and CO Emission from Upholstered Seating, p. 96

Burning Rate
Extinguishability of Flammable Textiles: Part III – Effects of Cooler, Inert Bodies, p. 135

Carpets
An Electrical Device for Evaluating the Ignitability of Textile Floor Covering Materials, p. 238

Cellulose Insulation
Combustibility of Loose Fiber Fill Cellulose Insulation: The Role of Borax and Boric Acid, p. 113

CO Emission
The Importance and Relevance of Burning Behavior, Smoke, and CO Emission from Upholstered Seating, p. 96

Combustibility
Combustibility of Loose Fiber Fill Cellulose Insulation: The Role of Borax and Boric Acid, p. 113

Consumer Product Flammability
Consumer Product Flammability: A Brief Review, p. 20

Cotton Batting
Boric Acid Treated Cotton Mattresses Resist Both Open Flame and Cigarette Ignition, p. 26

Ease of Extinguishment
Extinguishability of Flammable Textiles: Part III – Effects of Cooler, Inert Bodies, p. 135

Ease of Ignition
An Electrical Device for Evaluating the Ignitability of Textile Floor Covering Materials, p. 238

Electrical Ignition
An Electrical Device for Evaluating the Ignitability of Textile Floor Covering Materials, p. 238

Extinguishability
Extinguishability of Flammable Textiles: Part III – Effects of Cooler, Inert Bodies, p. 135

Filling Material
Study of the Burning Behavior of Upholstered Furniture, p. 3

Flaming Combustion
Combustibility of Loose Fiber Fill Cellulose Insulation: The Role of Borax and Boric Acid, p. 113

Flammability Testing
An Electrical Device for Evaluating the Ignitability of Textile Floor Covering Materials, p. 238

Flash Fire Propensity
Screening Tests on Materials Used in Home Furnishings and Consumer Products, p. 41

Relative Toxicity and Flash-Fire Propensity of the Pyrolysis Gases from Polyester Urethane Flexible Foams, p. 163

Foam
The Importance and Relevance of Burning Behavior, Smoke, and CO Emission from Upholstered Seating, p. 96

Healthcare
Flammability Characteristics of Healthcare Mattresses, p. 168

Heat Flux
Extinguishability of Flammable Textiles: Part III – Effects of Cooler, Inert Bodies, p. 135

Heat Sinks
Extinguishability of Flammable Textiles: Part III – Effects of Cooler, Inert Bodies, p. 135

Home Furnishings
Screening Tests on Materials Used in Home Furnishings and Consumer Products, p. 41

Ignitability by Radiant Heat of Some Materials in Home Furnishings, p. 68

Ignitability by Radiant Heat of Furniture Upholstery Fabrics, p. 220

A Compilation of Relative Toxicity Data on Furniture Upholstery Fabrics, p. 250

Hospital
Flammability Characteristics of Healthcare Mattresses, p. 168

Ignitability
Screening Tests on Materials Used in Home Furnishings and Consumer Products, p. 41

Ignitability by Radiant Heat of Some Materials in Home Furnishings, p. 68

Ignitability by Radiant Heat of Furniture Upholstery Fabrics, p. 217

An Electrical Device for Evaluating the Ignitability of Textile Floor Covering Materials, p. 238

Institutional
Flammability Characteristics of Healthcare Mattresses, p. 168

Interlayers
Study of the Burning Behavior of Upholstered Furniture, p. 3

Large Scale Testing
Study of the Burning Behavior of Upholstered Furniture, p. 3

Mattresses
Boric Acid Treated Cotton Mattresses Resist Both Open Flame and Cigarette Ignition, p. 26

Flammability Characteristics of Healthcare Mattresses, p. 168

Open Flame Ignition
Boric Acid Treated Cotton Mattresses Resist Both Open Flame and Cigarette Ignition, p. 26

Outer Covering
Study of the Burning Behavior of Upholstered Furniture, p. 3

Polyurethanes, Flexible
Minimizing Smolder Tendency in Flexible Polyurethanes, p. 59

Retardation of Combustion
Combustibility of Loose Fiber Fill Cellulose Insulation: The Role of Borax and Boric Acid, p. 113

Smoke Emission
The Importance and Relevance of Burning Behavior, Smoke, and CO Emission from Upholstered Seating, p. 96

Smoke Evolution
Screening Tests on Materials Used in Home Furnishings and Consumer Products, p. 41

Smoke Susceptability
Screening Tests on Materials Used in Home Furnishings and Consumer Products, p. 41

Smoldering
Smoldering Tests on Furniture and Aircraft Seat Fabrics, p. 123

A Bibliography of Published Information on Smoldering Combustion, p. 260

Smoldering Combustion
Boric Acid Treated Cotton Mattresses Resist Both Open Flame and Cigarette Ignition, p. 26

Combustibility of Loose Fiber Fill Cellulose Insulation: The Role of Borax and Boric Acid, p. 113

Smolder Minimization
Minimizing Smolder Tendency in Flexible Polyurethane, p. 59

Test Results
Minimizing Smolder Tendency in Flexible Polyurethane, p. 59

Textile Flammability
Extinguishability of Flammable Textiles: Part III – Effects of Cooler, Inert Bodies, p. 135

Ticking
Boric Acid Treated Cotton Mattresses Resist Both Open Flame and Cigarette Ignition, p. 26

Toxicity
Screening Tests on Materials Used in Home Furnishings and Consumer Products, p. 41

Relative Toxicity and Flash-Fire Propensity of the Pyrolysis Gases from Polyester Urethane Flexible Foams, p. 163

A Compilation of Relative Toxicity Data on Furniture Upholstery Fabrics, p. 250

Toxicity of Combustion Products
The Importance and Relevance of Burning Behavior, Smoke, and CO Emission from Upholstered Seating, p. 96

Upholstery Fabric
Screening Tests on Materials Used

in Home Furnishings and Consumer Products, p. 41

Ignitability by Radiant Heat of Some Materials in Home Furnishings, p. 68

Smoldering Tests on Furniture and Aircraft Seat Fabrics, p. 123

Ignitability by Radiant Heat of Furniture Upholstery Fabrics, p. 217

A Compilation of Relative Toxicity Data on Furniture Upholstery Fabrics, p. 250

Upholstered Furniture
Study of the Burning Behavior of Upholstered Furniture, p. 3

Upholstered Seating
The Importance and Relevance of Burning Behavior, Smoke, and CO Emission from Upholstered Seating, p. 96

Urethane Foam
Relative Toxicity and Flash-Fire Propensity of the Pyrolysis Gases from Polyester Urethane Flexible Foams, p. 163

Water Content and Smolder Tendency
Minimizing Smolder Tendency in Flexible Polyurethane, p. 59

Wood
Screening Tests on Materials Used in Home Furnishings and Consumer Products, p. 41

Wool Upholstery
The Importance and Relevance of Burning Behavior, Smoke, and CO Emission from Upholstered Seating, p. 96
